

DEVIL'S CLAW

- **A dietary supplement to support joint comfort and proper digestion.***

About Devil's Claw:

- Devil's Claw is a plant indigenous to South Africa and gets its name because of its large hooked claw-like fruit.
- The active ingredients in Devil's Claw are believed to be iridoid glycosides called harpagosides, which are found in the secondary root.
- Devil's Claw has been used for thousands of years in Africa for fever, joint discomfort and skin conditions.*

- **Devil's Claw and Joint Support:**

- Devil's Claw appears to support joint flexibility and comfort by its ability to promote the production of favorable prostaglandins (1 & 3) and leukotrienes.*

- **Devil's Claw and Digestive Support:**

- Devil's Claw acts as a diuretic, calming agent and a digestive stimulant.*
