

SOFT CHEWS

NATURAL FLEX

FOR MEDIUM AND LARGE DOGS

Containing Glucosamine and MSM

- A comprehensive formula for the support of hip, joint and connective tissue function for dogs in any stage of life.

Recommended for:

- Dogs with an advanced need of joint support.
- Geriatric, retired, working or sporting breeds.
- Dogs predisposed to joint and connective tissue stress.
- Dogs recovering from accidents or post surgery.

- Because age, breed, diet, lifestyle, injury, and stress can affect the health of any joint, **Natural Flex** Soft Chews are designed to meet the needs of your dog! This synergistic combination of ingredients optimizes your dog's joint function and comfort; while at the same time providing building blocks necessary to support normal joint structure.

About the nutrients:

- **Glucosamine** supports chondroitin sulfates and hyaluronic acid which are 2 glycosaminoglycans that are required for joint comfort, flexibility and give greater mobility to stressed joints.
- **Methylsulfonylmethane (MSM)** is a source of organic sulfur. Sulfur supports proper maintenance of connective tissue function.
- **Ascorbic Acid and Manganese** help maintain collagen and glycosaminoglycans like chondroitin sulfates and hyaluronic acid. As an antioxidant, it also protects tissues from free radical damage.
- This tasty soft chew makes maintaining joint health as easy as giving your dog a treat!

Directions For Use:

- 50 - 75 lbs: Give 2 chews in the morning and 1 chew at night.
- Over 75 lbs: Give 2 chews in the morning and 2 chews at night.
